BLACKBEAR AI

Your "Freedom With Content" Plan

CONGRATULATIONS once again on getting access to the powerful BLACKBEAR AI system. Before reading this document, we strongly suggest that you read the Quick Start document and instructions provided to help you get off on the right foot.

This brief startup plan will help you discover new ideas to use BLACKBEAR, as well as **strategies for monetizing it to its full potential for you.**

Again, by no means is this a complete list of all the ways that you can profit with BLACKBEAR, but it should absolutely inspire you…

> Consultant (reports, research, site content, newsletter content)
> Print on Demand (shirts, mugs, jewelry, card decks)
> Membership (reports, research, site postings)
> Affiliate Marketing (bonuses, bonus stack, social media)
> Training Courses (Udemy, Skillshare, Thinkific)
> Freelancing (SEO, article writing, subject, ad creation)
> Research (SEO keywords, help clients, freelance)
> Copywriter (AMZN descriptions, emails, long form)
> Book Summaries (Cliff's Notes, SparkNotes)
> Digital Products (Checklists, Guides, Packages)
> Authors (Amazon KDP, Print on Demand)
> Community Building (FB groups, YouTube, Forums)
> Content Platforms (Medium, Substack, Gumroad)
> Traffic Generation (TWTR, LinkedIn, Quora, Medium, SlideShare)

One of our favorite ways, and one of the ways to get started with BLACKBEAR the quickest and profit is to become a **"Middleman Freelancer."**

John showed a demo of this on the live webinar, but allow me to simply explain the process…

1.) You go to Upwork, Fiverr, Freelancer or any of the other freelancing networks and seek out jobs that are looking to pay you for content.

2.) You use BLACKBEAR to generate the content you need to fulfill the jobs, and even to create a "portfolio" to get you started to prove that you have expertise on the subject. Use the recipes provided in the accompanying document for a few sample of ideas of how to create great

content.

It's quite literally that simple and easy! We've included a set of 2 videos that detail this process - combine the "Middleman Technique" shown in those videos with BLACKBEAR and you truly have **a golden ticket.**

(**Note:** Those "Middleman" videos actually DO NOT mention BLACKBEAR, but they are still valuable and can help you grow your business into an entire service agency. Because you have BLACKBEAR, we strongly suggest that you stick to content-focused jobs and gigs at first.)

You can actually take it a step further and have others do the work for you…

You can completely automate your content production. We produce a lot of content ourselves using BLACKBEAR, but we also have a team generating content for us literally every day using the tools inside.

To help show you how we hire people to do this, I've included access to our **4-Hour Outsourcing training videos and hiring template,** which gives you a guideline on how we look for and hire virtual contractors to do work just like this for us. Note that "oDesk" has changed their name to "Upwork" since those videos were made.

For your reference, we've also included a copy of a book that we made almost entirely using BLACKBEAR in a matter of minutes, titled **"Make Money With Your Own Website: From First Click To Cash Collecting Powerhouse."**

Please do not distribute this book, as it is for your eyes only.

We've included this guide not only because it's full of clever ideas and resources that we personally use to profit from our own website and business, but also because we used BLACKBEAR to build almost all of it (excluding the introduction) and we wanted you to experience how we build and format books using the tools you now have first-hand.

Honestly, we've included **everything you need (**and more) already in this initial package…

But there's still *so much more* for you to come. **The best way to get started is to go experience BLACKBEAR and start using it for yourself.**

Try different words, phrases, and combine the powerful tools we have provided to create content that you can use to get traffic and profit. We truly can't wait to see what you create with it.

As always, please be sure to take advantage of having BETA ACCESS. Let our team know any way that we can improve your experience, and suggest new tools that we can build for you.
