

YES, You Can Use BLACKBEAR For Your Team & Partners!

CONGRATULATIONS!

As part of the BLACKBEAR Beta program, you have been granted the right to **share your login with team members, virtual assistants and partners** to use BLACKBEAR on your behalf to grow your business in any way you see fit.

You will need to share the **same username and password credentials** as were provided to you with your team and/or partners, as we will be keeping close track of the logins used by BETA Members.

To activate your team member and partner licenses, please follow this process:

- 1.) Have each of the partners and team members that you want authorized to use your account go to <https://whatismyipaddress.com/> and get their IPv4 IP address from the device that they intend to use BLACKBEAR. **Please** be sure they always access from that same device to avoid triggering our warning filters!
- 2.) Submit that IP address along with their respective name and e-mail address to our support team at <https://1099support.com>, and note your BLACKBEAR order ID and e-mail address. Use the ticket subject line: **"BLACKBEAR Authorized User"**
- 3.) **That's it!** Your team members are authorized to login using your username and password. If your team members need to access from a different device, please have them repeat the process above.

Please limit the use of this powerful tool to only a small number of your most trusted partners and assistants, as you will be sharing the same login with them.

If you need any assistance or have any questions, please don't hesitate to let us know.
